Homeschooling is legal in all 50 states, including New York. This pack organizes New York's published homeschool rules so you can see them in one place. It is legal information, not legal advice, and Homa is not a law firm. Downloading or filling out this pack does not notify New York and does not by itself satisfy any state requirement of any kind; the record templates become part of your own records once you fill them in, and where a filing is required, this pack links to the official channel. New York publishes one route for homeschooling families, and this pack covers it. Every rule here comes from the sources cited in this pack, last verified March 2026. Laws change, so the current statute is always worth a look before you act on a deadline. Make a fresh pack from Homa before each school year and before filing anything. If your situation is unusual, or a district ever questions your homeschooling, a homeschool-friendly attorney or a legal defense organization can advise you; this pack cannot.

Recorded learning days and hours

A snapshot of the learning time saved in Homa when this packet was made. Review every row before relying on it.

School year starts: Sep 1, 2026. A recorded day means at least one saved time entry for that child on that date. Family-wide time counts for every child. A date without a timed record does not establish absence.
